

Delivering Food Security through Agricultural Research:

Agricultural Research Council Commemorates Food Security Month

- The United Nations FAO estimates that the world population will grow to **9 billion by 2050**
- **60%** of this growth will be in the developing world, particularly in Africa
- StatsSA estimates that more than **12 million** South Africans go to bed hungry
- Fact: Land is not expanding – how do we feed the hungry and meet the needs of a growing population?
- South Africa and the world need **solutions** for food and nutrition security

CAN SCIENCE PROVIDE THESE SOLUTIONS?

Find out what the Agricultural Research Council has done over the past financial year. Catch the launch of the ARC 2013/14 annual report to stakeholders on 29 October 2014.

For more information about the launch,
contact Ms Hendrieta Moletsane at
tel. (012) 427-9807 or
