VISIT ONE STOP AGRICULTURAL STAND AT NAMPO HARVEST DAY 2023.

The NAMPO Harvest Day in Bothaville, which takes place from May 16 to 19, 2023, is one of the biggest agricultural shows on the continent, and the Agricultural Research Council (ARC) will once again participate. Since its inception, NAMPO Harvest Day has been at the forefront of showcasing agricultural innovation and providing a central platform for agricultural stakeholders both at home and abroad.

The ARC will showcase its latest research findings and technologies to agricultural scientists, commercial farmers, smallholder farmers and other stakeholders in the agricultural sector. NAMPO Harvest Day brings all these stakeholders under one roof to showcase the most cutting-edge innovations. In order to debate issues that are influencing food security and how the risk may be reduced, it also brings together policymakers, researchers and scholars. As a result, NAMPO Harvest Day has established itself as a one-stop shop throughout the years.

The agricultural sector is dealing with a wide range of issues that put food production in jeopardy, and NAMPO Harvest Day is a great opportunity to gather the necessary policymakers and food security specialists in support of the need to prioritise food security.

The Water Efficiency Maize for Africa (WEMA), a global private-public partnership striving to enhance food security and livelihoods among smallholder farmers in Sub-Saharan Africa by means of the development and widespread implementation of drought-tolerant and insect-protected hybrids of maize, will be one of the latest technologies on display.

Nampo Harvest Day is an opportunity to network with ARC researchers and discover new technologies in the agricultural sector. ARC researchers and experts will be ready to engage with everyone at stand No. 1-12 in the Liqui Molly Microbial Solutions Hall.
