

LIST OF POSTERS OF THE SUSTAINABLE RURAL LIVELIHOOD PROGRAM

ARC-Infruitec-Nietvoorbij

The posters can be obtained from ARC-Infruitec/
Nietvoorbij at a price of **R10.00 per poster (postage
and packaging excluded)**.

These posters are available in Xhosa, South-Sotho,
English and Afrikaans.

CANNING

DRYING OF TOMATOES

ECONOMIC POTENTIAL OF FIG PRODUCTION WITH EMPHASIS ON RESOURCE-LIMITED FARMERS IN SOUTH AFRICA

FACTORS AFFECTING WATER USE

FERTILISE FOR QUALITY FRUIT

FRUIT FLIES, THEIR ERADICATION AND BENEFITS FOR THE COMMUNITY

Fruit flies, their eradication, and benefits for the community

ARC-Infrafruitec and the Department of Agriculture, Forestry and Fisheries

THE PROCESS

1. Identify the problem
2. Investigate the problem
3. Develop a plan
4. Implement the plan
5. Evaluate the results

WHAT IS FRUIT FLY ERADICATION?

It is the trapping and release of millions of sterile fruit flies into the target area. The sterile males mate with wild females of the same species, but this mating does not result in any offspring (young larvae). It is successfully used for a number of pests in many different countries, especially in the tropics and subtropics.

THE BENEFITS FOR AGRICULTURE PRODUCTION

- The eradication programme will be successful in some regions and reduce the need for other control measures.
- ARC-Infrafruitec will provide the necessary support for the eradication programme.
- ARC-Infrafruitec will provide the necessary support for the eradication programme.
- ARC-Infrafruitec will provide the necessary support for the eradication programme.
- ARC-Infrafruitec will provide the necessary support for the eradication programme.

Financial benefit	Technical benefit	Ecological benefit
Reduction of the need for chemical pesticides	Reduction of the need for chemical pesticides	Reduction of the need for chemical pesticides

FRUIT PROCESSING TRAINING

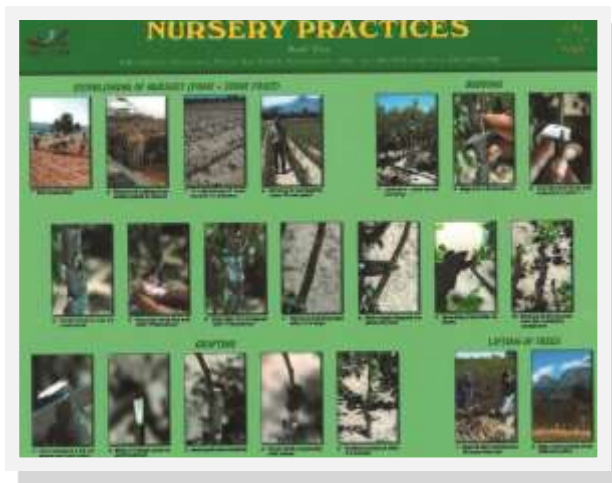

JAM MAKING

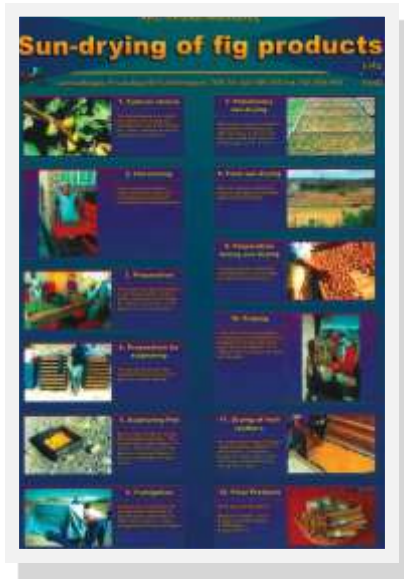

MONITORING AND CONTROLLING OF PESTS

NURSERY PRACTICES

SUN-DRYING OF FIGS

THE ROLE OF THE DEMONSTRATION PLOTS IN TRAINING
