ESTIMATED IRRIGATION REQUIREMENTS OF CROPS IN SOUTH AFRICA – Part 1

Irrigation requirements for crops grown in the Eastern Cape, Karoo, Natal and winter rainfall regions of South Africa (1985).

ESTIMATED IRRIGATION REQUIREMENTS OF CROPS IN SOUTH AFRICA – Part 2

Irrigation requirements for crops grown in the Highveld, Free State and Transvaal regions of South Africa (1985).

GRONDKLASSIFIKASIE – ‘N BINOMIESE SISTEEM VIR SUID-AFRIKA

Eerste uitgaaf van die grondklassifikasiesisteen, soos dit gebruik word in Suid-Afrika (1977).

GRONDKLASSIFIKASIE – ‘N TAKSONOMIESE SISTEEM VIR SUID-AFRIKA

Die boek is ‘n hersienne en uitgebreide uitgaaf van grondklassifikasiesisteen, wat gebruik word in Suid-Afrika (1991).

SOIL CLASSIFICATION: A NATURAL AND ANTHROPOGENIC SYSTEM FOR SOUTH AFRICA

The third revised edition of the soil classification system, as used in South Africa (2018).

This new edition contains more comprehensive soil information, improved definitions and new diagnostic horizons, more soil forms accommodating the current state of soil knowledge, and new photos. The open-ended system allows deeper horizons to be accommodated, whilst man-made soils are separated from natural soils.
